Mohammed Zayed Kherani

Peterborough, ON | (647) 394-9645 | zayedkherani@gmail.com

Professional Summary

Fourth-Year Astrophysics & Computer Science student at Trent University with a proven track record of leading engineering teams, teaching, and delivering production-grade software from concept to launch. As Chief Technical Officer of Tech Under 20, directed a team of four senior developers to redesign and rebuild core infrastructure in Node.js, while independently architecting machine learning systems and full-stack mobile applications recognized with national awards, including a Technological Winner title and a third-place finish at the Tech Under 20 Cup. Currently serves as a Teaching Assistant at Trent University and has built and shipped self-directed projects such as the Trent University Class Locator app, reflecting a consistent drive to identify problems and independently engineer solutions. Combines a strong technical foundation across Python, Java, Flutter, React.js, and machine learning frameworks with hands-on industry exposure, having supported dealership operations and workflow optimization at Queenston Chevrolet Buick GMC.

Education

Trent University | Peterborough, ON

Bachelor of Engineering: Astrophysics & Computer Science (4th Year) | Sept. 2023 – Present

Teaching Assistant | May 2026 – Present

- Facilitated MATH-1050H & MATH-1350H labs and tutorials, supporting student comprehension of core concepts.
- Graded assignments and exams, providing constructive feedback to help students improve performance.
- Held regular office hours to address student questions and reinforce lecture material.

Trent University Class Locator | Sept. 2023 – Apr. 2025

- Developed a navigation app from the ground up to help students locate classrooms across the Trent University campus.
- Designed the user interface and core wayfinding logic independently, delivering a functional tool for the student body.

Professional Experience

Queenston Chevrolet Buick GMC | Hamilton, ON

Sales Facilitator & Summer Intern | June 2023 – Aug. 2023

- Prepared and detailed vehicles for customer delivery, upholding high presentation standards across the showroom fleet.
- Maintained dealership lot cleanliness through consistent vehicle arrangement and organization, contributing to an attractive sales environment.
- Coordinated fueling, moving, and staging vehicles across the showroom and lot to support efficient daily operations.
- Enhanced the customer experience by ensuring vehicles were consistently ready and accessible for delivery.
- Collaborated with team members to maintain a safe, clean, and efficient dealership environment.

Tech Under 20 | Greater Halton Area (Remote)

Software Developer Lead / Senior Developer | Feb. 2022 – Sept. 2024

- Directed a team of four senior developers, coordinating the successful launch of internal applications while consistently meeting strict project deadlines.
- Rebuilt core backend infrastructure in Node.js, improving system stability and enhancing user experience for organizational members.
- Engineered back-end systems to manage event participation, streamlining organizational workflows through strong attention to detail.
- Architected machine learning systems and full-stack mobile applications that earned national recognition, including a Technological Winner title and a third-place finish at the Tech Under 20 Cup.
